

Annual Christian Homeschool Science and Engineering Fair

Dear Parents,

As you know, science, technology and engineering are highly valued skills sought by employers. As Twenty first century citizens, our students will also have to make some of the toughest decisions of any generation, based on their understanding of emerging science and technology.

Science and Engineering Fairs involve students in the practical application of science and engineering, encouraging them to apply these skills to a topic of interest to them. Doing science is key to understanding science!

Our homeschool community is hosting a science fair on Saturday March 21, 2020 and all area homeschool students are invited to participate. Hands-on scientific investigation and invention are the focus at our fair. Over the next several weeks, your child can design, test, analyze, and present a project that uses scientific methods to solve a problem. The sky's the limit!

Parents are encouraged to offer support and reminders, but please allow children to do the projects by themselves.

For more information and to register for the Annual Christian Homeschool Science Fair, please visit <http://christianhomeschoolsciencefair.weebly.com> Here you will find the rules, helpful guidelines and checklists by downloading the information packet.

For additional questions or to volunteer, please email the Fair Committee at homeschoolsciencefairtn@gmail.com. Thank you very much in advance for your support!

Sincerely yours,

The Christian Homeschool Science Fair Committee
